

Unit	Type	Rockhounding
<p>Ayres Rock (New)</p>	<p>ACEC</p>	<p>Most or all acreage is overlapped by NLCS across the alternatives.</p> <ul style="list-style-type: none"> • CMA for Soil, water, air: Restrict construction activities when soils are susceptible to heightened risk of erosion. • CMA for Cultural Resources: Increase patrol, Prohibit camping and recreational off highway vehicle use. • CMA for Trails and Travel Management: Objective: Limit Motorized vehicle impacts. Allowable Uses: Motorized, non-motorized, non-mechanized, etc. The ACEC is bounded by three open designated vehicle routes - SE435, SE756, and SE771- and the western boundary of the China Lake Naval Air Weapons Station (NAWS). An old vehicle route to Ayres Rock was partially closed several years ago. Visitors typically use this route to drive in partway to a small parking area before hiking the rest of the way into the site. There is one short user-created spur route to a campsite immediately off of SE756, and another much longer, user-created, non-designated route along the NAWS fence line north of the site. Both user-created routes need to be evaluated by a BLM archeologist before a decision is made to include them in the open designated route system. Management Action: All designated open routes will be signed, all routes identified as closed will be rehabilitated/restored, restore all undesignated OHV routes. • CMA for Recreation: Objective: Provide recreation opportunities that are consistent with resource protection. Allowable Uses: All forms of recreational use are allowed including but not limited to dispersed camping, hunting, photography, picnicking, climbing, rock hounding, astronomy/ star gazing, nature study and viewing as long as these activities due not degrade the relevant and important values that the ACEC is being established for. Management Action: Delineate the parking area from the surrounding area, perhaps with boulders of the same type and color as the flanking rock outcrops. Delineate the foot trail from the parking area to Ayer's Rock itself Maintain signs, vehicle barriers and kiosks. • CMA for Locatable Minerals Mineral Materials Non-energy Leasables: Mineral development will be prohibited within the ACEC unit boundary.
<p>Cerro Gordo (Existing)</p>	<p>ACEC</p>	<p>Most or all acreage is overlapped by NLCS across the alternatives.</p> <ul style="list-style-type: none"> • CMA for Soil, water, air: Restrict development activities where soils are susceptible to heightened risk of erosion. • CMA for Trails and Travel Management: Allocation/Restriction: OHV limited. Improve vehicle access for safety and access to manage resources. All Action Alternatives add the following: Objective: Maintain current travel allocation as Limited. Allowable uses: Motorized, non-motorized, non-mechanized, etc. Management Actions: Limit vehicles to open designated routes by posting signs, updating maps as appropriate. Stop vehicle incursions off-route into roadless areas, particularly from breaching the top of Conglomerate Mesa. All routes identified as closed and/or translinear disturbances will be rehabilitated and restored. • CMA for Recreation: Objective: Provide dispersed opportunities for the enjoyment of the area attributes. Allowable Uses: All forms of recreational use are allowed including but not limited to dispersed camping, hunting, photography, picnicking, climbing, rock hounding, astronomy/ star gazing, nature study and viewing as long as these activities due not degrade the relevant and important values that the ACEC is being established for. • CMA for Locatable Minerals Mineral Materials Non-energy Leaseables: Allocation: restricted mineral exploration and development. See programmatic NLCS objective and action items in general mineral resources rules. Existing mining proposals and any future proposals will be analyzed on a case-by-case basis and cumulatively, to assess whether they can be accommodated within the ACEC and its management goals.
<p>Christmas Canyon (Expanded)</p>	<p>ACEC</p>	<p>All acreage is overlapped by NLCS across the alternatives.</p> <ul style="list-style-type: none"> • CMA for Soil, water, air: Restrict construction and recreation activities when soils are susceptible to heightened risk of erosion. • CMA for Trails and Travel Management: Objective: Designate the area within the boundary as Limited Use. Limit motorized vehicle impacts. Allowable Uses: Motorized, non-motorized, non-mechanized, etc. Management Actions: Identify and designate routes within the new Limited Use Area. Identify access routes which minimize impact to resources. Limit vehicles to open designated routes by signing, fencing, and barriers. Rehabilitate and restore closed and translinear disturbance routes. • CMA for Recreation: Under the No Action Alternative: Within the Spangler Hills Open Area, non-competitive motorized vehicles have full access of the area. Require competitive events to be held on existing routes. Under All Action Alternatives: Objective: Provide recreation opportunities that are compatible with cultural resource preservation by providing dispersed opportunities for enjoyment of the ACEC attributes. Allowable Uses: All forms of recreational use are allowed including but not limited to dispersed camping, hunting, photography, picnicking, climbing, rock hounding, astronomy/ star gazing, nature study and viewing as long as these activities due not degrade the relevant and important values that the ACEC is being established for. Restricted Special Recreation Permits for motorized events Management Actions: No competitive motorized events within ACEC. Non-competitive motorized events limited to open designated routes. • CMA for Minerals (Locatable, Leasable, Mineral Materials): Lode and placer mining claims are currently on file. Objective: Support the national need for reliable and sustainable domestic minerals while protecting sensitive resources in the area. Allowable Use: Casual Use mining allowed with approved plan of operations. Management Action: New proposals will need to be analyzed at on a case-by-case basis and cumulatively, to assess whether they can be accommodated within the ACEC and its management goals.

Unit	Type	Rockhounding
Conglomerate Mesa (New)	ACEC	<p>All acreage is overlapped by NLCS across the alternatives.</p> <ul style="list-style-type: none"> • CMA for Soil, water, air: Objective: Restrict development activities where soils are susceptible to heightened risk of erosion. • CMA for Trails and Travel Management: Allocation/Restriction: OHV limited. Improve vehicle access for safety and access to manage resources. All Action Alternatives add the following: Objective: Maintain current travel allocation as Limited. Allowable uses: Motorized, non-motorized, non-mechanized, etc. Management Actions: Limit vehicles to open designated routes by posting signs, updating maps as appropriate. Stop vehicle incursions off-route into roadless areas, particularly from breaching the top of Conglomerate Mesa. All routes identified as closed and/or translinear disturbances will be rehabilitated and restored. NOTE: There is an error in NEMO. The Keeler-Death Valley trail across the top of Conglomerate Mesa is NOT a vehicle route. It is an historic foot and mule trail that extends from Keeler all the way to Ubehebe Crater in Death Valley National Park. This trail needs to be inventoried for cultural resources and a cultural-recreation activity plan developed before it can be formally adopted into BLM's trail system as a non-motorized trail. • CMA for Recreation: Objective: Provide dispersed opportunities for the enjoyment of the area attributes. Allowable Uses: All forms of recreational use are allowed including but not limited to dispersed camping, hunting, photography, picnicking, climbing, rock hounding, astronomy/ star gazing, nature study and viewing as long as these activities due not degrade the relevant and important values that the ACEC is being established for. • CMA for Locatable Minerals Mineral Materials Non-energy Leaseables: Allocation: restricted mineral exploration and development. See programmatic NLCS objective and action items in general mineral resources rules. Existing mining proposals and any future proposals will be analyzed on a case-by-case basis and cumulatively, to assess whether they can be accommodated within the ACEC and its management goals.
Crater Mountain (Expanded)	ACEC	Missing-No worksheet
El Paso to Golden Wildlife Linkage (New)	ACEC	<p>NLCS is only in Alternative 2.</p> <ul style="list-style-type: none"> • CMA for Soil, water, air: Restrict construction activities when soils are susceptible to heightened risk of erosion. Management Action: Ensure soils to meet or exceed the Soil Standard of Rangeland Health, as indicated by ground or plant cover, diversity of plant species, minimal evidence of accelerated wind and water erosion and the presence of biological soil crusts where appropriate. • CMA for Trails and Travel Management: Objective: Limit motorized vehicles to designated routes and prevent user- created routes from developing. Allowable Uses: Motorized, non-motorized, Non-mechanized, etc. Management Actions: Use minimization criteria for designating routes in Mohave ground squirrel and Desert tortoise habitat. All designated open routes will be signed, all routes identified as closed will be rehabilitated/restored, restore all undesignated OHV routes. Management Actions: Increase information to public and LE patrols. • CMA for Recreation: Objective: Provide dispersed recreational opportunities for enjoyment of the ACEC attributes while protecting the sensitive resources. Allowable Uses: Dispersed camping. Management Action: Increase information to public and LE patrols, maintain signs, vehicle barriers and kiosks, and work with volunteers to clean-up parking and camping areas on a regular basis. • CMA for Locatable Minerals Mineral Materials Non-energy Leaseables: Objective: Support the national need for reliable and sustainable domestic minerals while protecting the sensitive resources in the area. Allowable Uses: There are many small mining operations in the area, each less than 1 acre in size. Management Action: New proposals will need to be analyzed at on a case-by-case basis and cumulatively, to assess whether they can be accommodated within the ACEC and its management goals. There is a large gravel pit that has been excluded from the ACEC, because it is inconsistent with ACEC designation. It extends over approximately 50 acres. The operators have an application pending to expand their operations beyond their current footprint.
Fossil Falls (Expanded)	ACEC	<p>All acreage is overlapped by NLCS in Alternatives Preferred, 2, and 4, and no NLCS land is in Alternatives 1 and 3.</p> <ul style="list-style-type: none"> • CMA for Trails and Travel Management: Objective: Limit impacts from OHV use by designating and limiting trail use. Allowable Uses: Motorized, non-motorized, non-mechanized restricted from foot trails. Limited use in and around ACEC. Management Action: Install protective vehicle barriers and closures signs. Management Action: Develop foot trail. Management Action: Regularly monitor trail use. Management Action: Restore and rehabilitate trails as appropriate. • CMA for Recreation: Objective: Provide recreation opportunities that are consistent with resource protection. Objective: Provide dispersed opportunities for enjoyment of the ACEC attributes. Allowable Uses: Camping and picnicking in designated areas. Firearms prohibited. Rock climbing where impacts to cultural resources are minimized. Management Action: Develop trails/ designate day use and camping areas. Management Action: Develop interpretive materials for ACEC/ cultural resources. Management Action: Develop interpretive materials for recreational. Management Action: opportunities, including allowable rock climbing activities and location. • CMA for Locatable Minerals Mineral Materials Non-energy Leaseables: Objective: Allow for valid and existing active mining rights for pumice deposits and cinder cones. Allowable Uses: No surface entry within the Fossil Falls Archaeological District. Management Action: New proposals will need to be analyzed at on a case-by-case basis and cumulatively, to assess whether they can be accommodated within the ACEC and its management goals of maintaining scenic values and minimizing impacts to cultural values.

Unit	Type	Rockhounding
Great Falls Basin (Expanded)	ACEC	<p>Only Alternative 2 will have a complete overlapped with the NLCS on ACEC lands. The other alternatives only have 5% overlap with NLCS on ACEC lands.</p> <ul style="list-style-type: none"> • CMA for Soil, water, air: Restrict construction activities when soils are susceptible to heightened risk of erosion. Management Action: Follow proper procedures for eliminating ROWS and removing developments where they are no longer in use or are not being used for the (mostly mining) purposes for which they were granted. • CMA for Trails and Travel Management: Objective: Limit motorized vehicles to open designated routes and prevent user-created routes from developing. Allowable Uses: Motorized, non-motorized, non-mechanized, etc. No vehicle use within the Argus Mt Vehicle Closed Area. Management Actions: All designated open routes will be signed, all routes identified as closed will be rehabilitated/restored, restore all undesignated OHV routes. • CMA for Recreation: Objective: Provide diverse recreational opportunities that are compatible with the ACEC values and the protection of Protect sensitive riparian resources (i.e. nesting Inyo CA Towhee) and people from the risk of fire and accidental shooting. Allowable Uses: All forms of recreational use are allowed including but not limited to dispersed camping, hunting, photography, picnicking, climbing, rock hounding, astronomy/ star gazing, nature study and viewing as long as these activities due not degrade the relevant and important values that the ACEC is being established for. Management Action: No camping within 200 yards of springs and riparian areas. Management Actions: Follow-through with the existing Great Fall Basin ACEC recommendation to prohibit target shooting within the original ACEC boundaries in the large wash on the approach to and at the base of the falls. This prohibition is necessary to reduce litter (particularly broken glass) and to protect public safety. Management Action: Increase LE ranger patrols to enforce compliance with fire restrictions, camping limits, and vehicle use on the designated route system. Management Action: Increase information to public and LE patrols, maintain signs, vehicle barriers and kiosks, and work with volunteers to clean-up parking and camping areas on a regular basis. • CMA for Locatable Minerals Mineral Materials Non-energy Leaseables: Objective: Support the national need for reliable and sustainable domestic minerals while protecting the sensitive resources in the area. Allowable Uses: Exclusion Area: Critical habitat for Inyo CA Towhee. Management Actions: New proposals will need to be analyzed at on a case-by-case basis and cumulatively, to assess whether they can be accommodated within the ACEC and its management goals.
Last Chance Canyon (Expanded)	ACEC	<p>Only Alternative 2 will have a complete overlapped with the NLCS on ACEC lands. The other alternatives only have 60% overlap with NLCS on ACEC lands.</p> <ul style="list-style-type: none"> • CMA for Soil, water, air: Restrict construction and recreation activities when soils are susceptible to heightened risk of erosion. • CMA for Trails and Travel Management: Objective: Limit Motorized vehicle impacts. Allowable Uses: Motorized, non-motorized, non-mechanized, etc. Management Action: All designated open routes will be signed, all routes identified as closed will be rehabilitated/restored, restore all undesignated OHV routes. • CMA for Recreation: Objective: Provide recreation opportunities that are consistent with resource protection. Objective: Provide dispersed opportunities for enjoyment of the ACEC attributes. Allowable Uses: All forms of recreational use are allowed including but not limited to dispersed camping, hunting, photography, picnicking, climbing, rock hounding, astronomy/ star gazing, nature study and viewing as long as these activities due not degrade the relevant and important values that the ACEC is being established for. Management Action: Maintain signs, vehicle barriers and kiosks, Regular patrol. • CMA for Locatable Minerals Mineral Materials Non-energy Leaseables: Objective: Maintain Use Classification of C and L of CDCA Plan for mining claims. Allowable uses: Mining with approved plan of operations. New proposals will need to be analyzed at on a case-by-case basis and cumulatively, to assess whether they can be accommodated within the area and its management goals.
Manzanar (New)	ACEC	<p>No NLCS on the ACEC lands. NA CMA.</p>
Olancha Greasewood (New)	ACEC	<p>Most or all acreage is overlapped by NLCS across the alternatives except for Alternative 1 only about 15% is overlapped.</p> <ul style="list-style-type: none"> • CMA for Soil, water, air: Restrict construction activities when soils are susceptible to heightened risk of erosion. • CMA for Trails and Travel Management: Objective: Protect sensitive habitat from impacts associated with vehicle traffic. Allowable Uses: Motorized, non-motorized, non-mechanized, etc. All vehicle traffic limited to designated roads and trails Management Action: Sign designated routes routinely Management Action: Increase information to public and LE patrols. • CMA for Recreation: Objective: Provide dispersed opportunities for enjoyment of the ACEC attributes. Allowable Uses: All forms of recreational use are allowed including but not limited to dispersed camping, hunting, photography, picnicking, climbing, rock hounding, astronomy/ star gazing, nature study and viewing as long as these activities due not degrade the relevant and important values that the ACEC is being established for. Management Action: Increase information to public and LE patrols; maintain signs, vehicle barriers and kiosks. • CMA for Locatable Minerals Mineral Materials Non-energy Leaseables: Objective: Support the national need for reliable and sustainable domestic minerals while protecting this UPA. Management Action: New proposals will need to be analyzed at on a case-by-case basis and cumulatively, to assess whether they can be accommodated within the ACEC and its management goals.
Owens Lake (New)	ACEC	<p>No NLCS on the ACEC lands.</p> <ul style="list-style-type: none"> • CMA for Soil, water, air: Objective: Stabilize dunes for protection of cultural resources and to limit PM10 emissions. Allowable uses: Uses that are scientific or that would not adversely affect the cultural resources.

Unit	Type	Rockhounding
Panamint and Argus (New)	ACEC	<p>Over 50% of the total acreage is overlapped by NLCS across the alternatives.</p> <ul style="list-style-type: none"> • CMA for Soil, water, air: Restrict construction activities when soils are susceptible to heightened risk of erosion. Maintain the vehicle closure in Surprise Canyon beyond Chris Wicht Camp until a final decision is reached about vehicle use in the canyon corridor and/or Wild and Scenic River legislation is passed. • CMA for Trails and Travel Management: Objective: Limit vehicles to open designated routes and prevent user-created routes from developing. Allowable Uses: Motorized, non-motorized, non-mechanized, etc. Continue and enforce vehicle closure on Panamint Dry Lake. Restrict vehicle use across the lakebed to a small number of open, designated routes. Management Actions: Sign designated routes routinely. Use minimization criteria for designating routes in Mohave ground squirrel and desert tortoise habitat and any bighorn sheep lambing areas. Keep routes out of streams and significant riparian areas where good alternatives exist, i.e., Pleasant Canyon. Where routes need to cross streams and riparian areas, they will be managed appropriately to minimize impacts. Interpret open designated vehicle routes following historic trails, such as the Escape Trail and the Nadeau Trail, through the area. Develop and manage these trails to provide for a high quality, primitive recreational experience, emphasizing scenery and historic significance. • CMA for Recreation: Objective: Provide diverse recreational opportunities that are compatible with the ACEC values. Allowable Uses: All forms of recreational use are allowed including but not limited to dispersed camping, hunting, photography, picnicking, climbing, rock hounding, astronomy/ star gazing, nature study and viewing as long as these activities do not degrade the relevant and important values that the ACEC is being established for. Management Actions: Follow-through with the existing Great Fall Basin ACEC recommendation to prohibit target shooting within the original ACEC boundaries in the large wash on the approach to and at the base of the falls. This prohibition is necessary to reduce litter (particularly broken glass) and to protect public safety. Increase LE ranger patrols to enforce compliance with fire restrictions, camping limits, and vehicle use on the designated route system. Impose seasonal and/or permanent restrictions on target shooting in sensitive riparian areas and where large numbers of people congregate to park or camp. Increase information to public and LE patrols, maintain signs, vehicle barriers and kiosks, and work with volunteers to clean-up parking and camping areas on a regular basis. Enforce prohibitions on camping and firewood collecting in the mesquite bosques on and along Panamint Lake and within the Surprise Canyon riparian zone. Within the original Great Falls Basin ACEC, continue hill climb reclamation, graffiti removal, camping and fire restrictions (no closer than 200 meters from a desert wildlife watering hole), and burro enclosure fences. Extend similar protections as needed to maintain visual resources, protect springs and riparian areas, and to support towhees within the expanded area in Northern Searles Valley and throughout the Argus Range. • CMA for Rights of Way: Objective: Provide for existing and new ROWs while protecting the sensitive resources. Allowable Uses: There are several existing ROWs in the area, including roads, power lines, and water pipelines servicing private property, Searles Valley Minerals, the Briggs Mine, and a handful of other active mining and material collection sites in the area. Exclusion Area: Critical habitat for Inyo CA Towhee. Management Action: New proposals will need to be analyzed at on a case-by-case basis and cumulatively, to assess whether they can be accommodated within the area and its management goals. Follow BMP for Avian Protection on transmission lines, etc. Existing water diversions, pipelines, and wells on public lands should be checked for legitimacy of use (authorized ROWS and terms of use) and condition. All unauthorized uses should be terminated and unauthorized developments, unless historic in nature, removed. • CMA for Locatable Minerals Mineral Materials Non-energy Leaseables: Objective: Support the national need for reliable and sustainable domestic minerals while protecting the sensitive resources in the area. Allowable Uses: There is one small active mining operation (the Goldbug Mine, a two-pro prospector, hard rock gold mining operation) and one small Inyo County material storage and mixing site for highway maintenance within the proposed ACEC. In addition, there is a ROW associated with the paved portion of the Nadeau Trail, which accesses an active Limestone Quarry on Private Patented Land used by the ACE Co-Generation facility in Trona. There is also a ROW associated with the bypass route around the riparian area in Pleasant Canyon and the improved portion of the upper Pleasant Canyon route. This ROW services the Radcliffe Mine, a gold mine operation on patented private lands. There is one pending proposal for exploratory drilling on Panamint Lake. Exclusion Area: Critical habitat for Inyo CA Towhee. Management Actions: New proposals will need to be analyzed at on a case-by-case basis and cumulatively, to assess whether they can be accommodated within the ACEC and its management goals. NOTE: The Briggs Mine is incompatible with the goals of this ACEC. The current mine and its larger permitted exploration area have been excluded from the ACEC, as has Brigg's permitted clay collection area on Panamint Lake.
Rose Spring (Expanded)	ACEC	<p>All acreage is overlapped by NLCS in Alternatives Preferred, 2, and 3, and only about 12% of the lands is overlapped by NLCS land in Alternatives 1 and 4.</p> <ul style="list-style-type: none"> • CMA for Trails and Travel Management: Objective: Limit Motorized vehicle impacts. Allowable Uses: Motorized, non-motorized, non-mechanized, etc. All Roads closed except through designated routes. Management Action: All designated open routes will be signed, all routes identified as closed will be rehabilitated/restored, restore all undesigantated OHV routes. • CMA for Recreation: Objective: Provide recreation opportunities that are consistent with resource protection. Allowable Uses: Limited access/Controlled by gate. Management Actions: Signs for interpretation/entry/closure. Regular Patrol of law enforcement to prevent unauthorized collecting and vandalism of cultural resources. • CMA for Locatable Minerals Mineral Materials Non-energy Leaseables: Five current mining claims.

Unit	Type	Rockhounding
Sierra Canyons (New)	ACEC	<p>Most or all acreage is overlapped by NLCS across the alternatives except for Alternative 2 only about 25% is overlapped.</p> <ul style="list-style-type: none"> • CMA for Soil, water, air: Restrict construction activities when soils are susceptible to heightened risk of erosion. • CMA for Objective: Limit vehicles to open designated routes and prevent user-created routes from developing. Allowable Uses: Motorized, non-motorized, Non-mechanized. <p>Management Actions: Sign designated routes routinely. Rehabilitate unauthorized vehicle play areas and hill climbs, particularly where off-route vehicle use is creating problems for wildlife and visual resources. Avoid designating routes in high value streams and riparian areas. Where routes need to cross streams and riparian areas, they will be managed appropriately to minimize impacts. Avoid designating routes where they are not sustainable, i.e., on steep, loose sandy and/or gravelly slopes. Attempt to re-route routes so they switch back down slopes instead of plummeting straight down. Use minimization criteria for designating routes in Mohave ground squirrel and Desert tortoise habitat. Increase information to public and LE patrols. For complete description, see Eastern Sierra SRMA.</p> <ul style="list-style-type: none"> • CMA for Recreation: Objective: Provide dispersed opportunities for enjoyment of the ACEC attributes. Protect sensitive riparian resources (i.e. nesting birds) and people from the risk of fire and accidental shooting Allowable Uses: All forms of recreational use are allowed including but not limited to dispersed camping, hunting, photography, picnicking, climbing, rock hounding, astronomy/ star gazing, nature study and viewing as long as these activities due not degrade the relevant and important values that the ACEC is being established for. Management Action: Increase information to public and LE patrols, maintain signs, vehicle barriers and kiosks, and work with volunteers to clean-up parking and camping areas on a regular basis. Impose seasonal restrictions on target shooting in sensitive riparian areas and where large numbers of people congregate to park or camp. Increase LE ranger patrols to enforce compliance with fire restrictions, camping limits, and vehicle use on the designated route system. • CMA for Locatable Minerals Mineral Materials Non-energy Leaseables: Objective: Support the national need for reliable and sustainable domestic minerals while protecting the sensitive resources in the area. <p>Management Actions: New proposals will need to be analyzed at on a case-by-case basis and cumulatively, to assess whether they can be accommodated within the ACEC and its management goals.</p>
Trona Pinnacles (Expanded)	ACEC	<p>Most or all acreage is overlapped by NLCS in Alternatives Preferred, 2, and 4, and no NLCS land is in Alternatives 1 and 3.</p> <ul style="list-style-type: none"> • CMA for Soil, water, air: Objective: Protect unique geologic formations from undue degradation. Allowable uses: Activities which do not result in soil loss or erosion. Management Action: Increase ranger patrol. Provide interpretive and educational opportunities. Monitor for soil compaction. • CMA for Trails and Travel Management: Objective: Minimize impacts to the Trona Pinnacles through designation of routes and trails through the area. Allowable Use: Motorized, non-motorized, non-mechanized limited access to designated trails. Management Action: Install and maintain Highway destination signs. Designate routes for travel. Restore, Rehabilitate, or otherwise block access on non-designated trails. • CMA for Recreation: Objective: Enhance visitor experience. Allowable Uses: All forms of recreational use are allowed including but not limited to dispersed camping, hunting, photography, picnicking, climbing, astronomy/ star gazing, nature study and viewing as long as these activities due not degrade the relevant and important values that the ACEC is being established for. Variety of day use activities. Management Action: Establish a day use area with picnic area and toilet. Closed to firearms. Limit OHV use to designated routes. Create interpretive guide and trails. No camping at the designated picnic area. • CMA for Locatable Minerals Mineral Materials Non-energy Leaseables: Not an allowable use. Mineral development is not compatible with NLCS and ACEC unit values and criteria. Management Action: Withdrawal from mineral entry.
Warm Sulfur Springs (Expanded)	ACEC	<p>All acreage is overlapped by NLCS across the alternatives except no NLCS land is in Alternative 1.</p> <ul style="list-style-type: none"> • CMA for Trails and Travel Management: Objective: Limit vehicles to open designated routes and prevent user-created routes from developing. Allowable Uses: Motorized, non-motorized, non-mechanized, etc. Management Actions: Sign designated routes routinely. • CMA for Recreation: Objective: Provide for recreational opportunities that are compatible with the protection of ACEC resource values. Allowable Uses: All forms of recreational use are allowed including but not limited to hunting, photography, picnicking, climbing, rock hounding, astronomy/ star gazing, nature study and viewing as long as these activities due not degrade the relevant and important values that the ACEC is being established for. Management Actions: Provide opportunities for visitors to learn about the natural and cultural values of the area. Establish the area as a Watchable Wildlife Site. Eliminate camping in the ACEC. Enforce prohibitions on camping and firewood collecting. Evaluate visitor needs. Prepare a Site Enhancement Plan for Signs, Brochures, Kiosks, Walkways, trails and viewing areas. • CMA for Locatable Minerals Mineral Materials Non-energy Leaseables: Objective: Support the national need for reliable and sustainable domestic minerals while protecting the sensitive resources in the area. Allowable Uses: Restrict mining activity to upland sites, east of the Indian Ranch road. Management Actions: New proposals will need to be analyzed at on a case-by-case basis and cumulatively, to assess whether they can be accommodated within the ACEC and its management goals.
